

An innovative asset management solution for coffee roasters, wholesalers and bean distributors.

Deliver a complete coffee solution

with integrated tracking of all your branded assets at any location.

- ☛ Efficient equipment & branded merchandise distribution and site placement decisions using a dedicated sales manager app with real-time asset availability and gradings.
- ☛ Eliminate unnecessary and costly call-outs with a barista service app, planned maintenance scheduling, smart IoT predictive maintenance and automated warranty tracking.
- ☛ Supercharge first-time-fix rates with spare parts management alongside powerful analytics and reporting.
- ☛ See the whole picture with full lifecycle cost tracking and holistic data visualisation of assets and service history.
- ☛ Seamless integration into your existing accounting and CRM platforms and between you and other mendrhub connected suppliers.

Powerful automation technology

that simplifies complex processes with unrivalled efficiency.

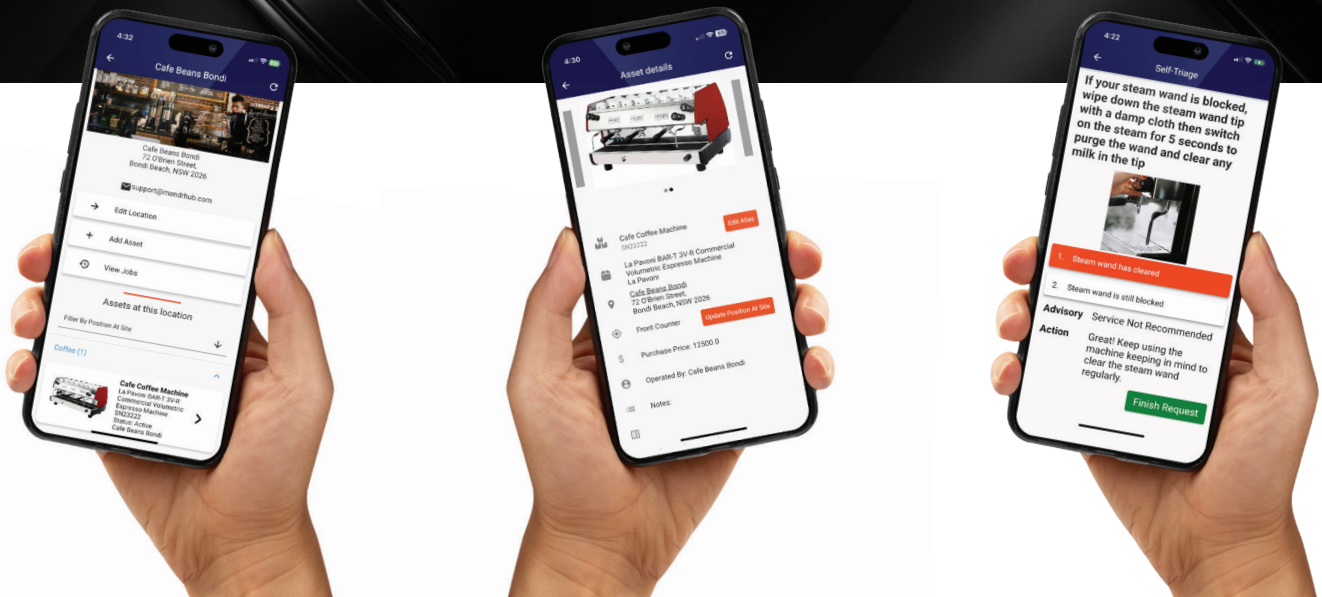

- ☛ Claim back your time and reduce costs.
- ☛ Gain job workflow visibility on the go, from start-to-finish.
- ☛ Improve operational efficiency, minimise downtime and maximise profits.
- ☛ Gain real-time data for performance tracking and process optimisation.
- ☛ Deliver a consistent and world-class experience for your customers.
- ☛ Mitigate business risk with in-house technician and contractor compliance.

Mendrhub delivers a seamless user experience designed to cut costs, boost brand loyalty and help you sell more beans!

Revolutionise your business with a software platform that handles all your coffee partner needs, from branded equipment management to multi-site field service, logistics and client management.

Provide an exceptional experience with multi-site management — all from the palm of your hand.

Dedicated Sales Manager app with access to real-time asset availability and grades

Manage your equipment placement, installation, commissioning and planned maintenance

Quick field service call-outs from your customer's mobile device using asset QR-codes

Reduce downtime with in-app self-triage to diagnose and rectify machine issues
